Sustainable & Innovative Foodware & Food Packaging

The Innovation Difference

TRIA is a sustainable and innovative food packaging company.

Our range of earth-friendly disposable tableware includes lunch boxes, cake boxes, carriers, cups and cutlery.

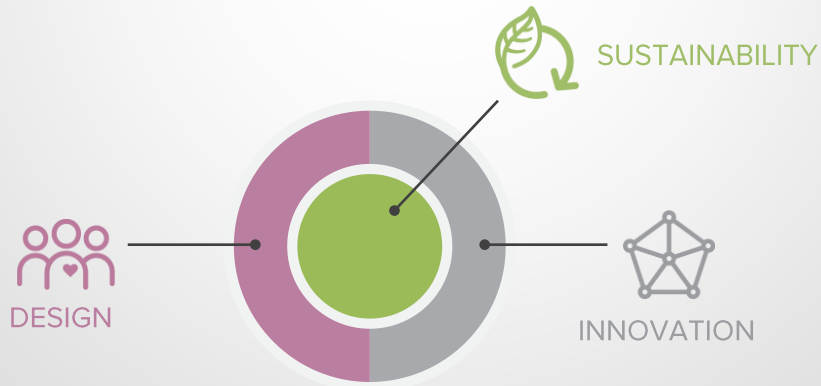

"Tapao, no plastic"

Takeaways, no plastic bags needed

We develop our products from concept through to manufacturing. Our team has over 10 years of experience in design innovation and packaging automation. And we take pride in our capacity to challenge well-established packaging archetypes with creative innovation.

The Heart-factor in Sustainability

At TRIA, we adopt a 360° mindset to ensure sustainability in our packaging. We believe that Design for Sustainability is a system mindset, one that integrates beauty, convenience and value, rather than just green material replacements. This is what we consider the heart-factor, which is what ensures sustainability in adoption.

driCAST technology

TRIA's proprietary driCast process which allows food grade paper to be casted into custom 3D forms. This enables design freedom in 3D, starting from a flat sheet of paper. A first in the industry, coming soon...

*dri*CAST
From flat to 3D

Saving the world never looked more delicious...

What's better than great looking food and an ease of mind knowing that your disposable wares will go back to nature the same way they came. Playing your part for the environment could not be easier.
